Frequency count sheet

Count a behavior that has a clear start and end, then turn the count into a rate so different days compare fairly.

1. Define it so a stranger could count it: what counts, and what doesn't.
2. Write the start time, then make one tally mark each time it happens.
3. Write the stop time, the minutes and the total.
4. Rate = total ÷ minutes. Use rate whenever sessions differ in length.

Learner (initials or a code) _____ Behavior _____ Observer _____

Definition: what counts, what doesn't

The grey row is a made-up example.

Date	Start	Stop	Minutes	Tally	Total	Rate per minute
9/23	*9:00*	*9:20*	*20*	*IIII*	*4*	*0.2*
