Check	What I see
Axis: what is counted, per what?	
How many dots before the plan-change line, and how many after? (Rule of thumb: about 3 to 5 steady dots on each side before you judge; fewer, ask the BCBA.)	
Typical level before the line / typical level after the line	
Trend: up / down / flat	
Bounce: steady / bouncy	
Where is the vertical line? Did the change start there and hold?	
Missing days, and why	
My verdict: working / not yet / can't tell
