# Trial-by-trial data sheet

Record each teaching trial as correct alone, an error, or prompted, and get a percent for each target.

1. Give the instruction once per trial.
2. Mark + for correct with no help, – for an error or no answer, P when you helped.
3. A prompted trial is not a correct trial: only + counts.
4. Percent = + marks ÷ trials × 100.

Learner (initials or a code) _____ Date _____ Teacher _____
